## EXECUTIVE SUMMARY

This is a report template to be used by members of SpaceHQ to create reports- it generously (or shamelessly) borrows from NASA-L<sup>A</sup>T<sub>E</sub>X-Docs.

With this L<sup>A</sup>T<sub>E</sub>Xpackage, the formatting is all handled internally so that report developers only need to create their own content following a provided template (or even create their own). If not using a template (example: AIAA or IEEE submission), this package also comes with an incredibly versatile, OS independent, Python build script and Latexmk configuration file for easy document type-setting and warning/error detection.
